

Water, oil & dust tight buttable enclosures

- Quick Features :**
- Poured gasket
 - ¼ turn lock
 - Drip shield
 - Superior hinging
 - Buttable mounting
 - Seamless welding
 - Panel is included
 - Panel is double bent
 - Powder coated

The 5412 ESBU water, oil & dust tight enclosures are used indoors or outdoors in areas where the enclosures may be subject to hosing or to water coming from any direction or for protection against dust, dirt or oil splashing. The 5412 ESBU are made from quality 14 GA or 16 GA steel, with corner seams continuously welded. The opening has a curled lip around all sides to prevent dripping water from entering the enclosure when the door is open,

it also increases rigidity. A high quality robotically poured-in-place seamless gasket ensures a complete and durable water tight seal. **The hinges are arranged to allow the installation of rows of enclosures, side by side.** A ¼ turn locking mechanism (or 3 point latch system on larger enclosures) insures positive closing. Internal mounting holes are provided. Body stiffeners are provided on larger models. Each enclosure comes **complete with**

a **12 GA inner panel** which is double bent* for maximum rigidity and which mounts on M8 welded studs. Enclosures and panels are finished with heat fused polyester powder, electrostatically applied on a phosphatized base. Box is ANSI/ASA 61 gray, panel is white (other colors available). **CSA Certified / UL Listed NEMA 4-12 / IP66**
