The 5500 ESY right flange-mounted safety disconnect enclosures are used indoors for protection against dirt, dust and water splashing. The 5500 ESY are made from quality 14 GA or 16 GA steel, with corner seems continuously welded. The opening has a curled lip around three sides to prevent dripping water from entering the enclosure when the door is open, it also increases rigidity. The pins of the concealed hinges can be pulled out to

remove the door. The 5500 ESY features a convenient factory-installed door handle which interlocks with the disconnect switch and facilitates the installation of the enclosure, streamlines the ordering process and increases the ease of use of the enclosure. Enclosures higher than 42" are equipped with a 3 point locking mechanism while smaller enclosures come with a 2 point locking mechanism. Door and body stiffeners are also provided on larger

models. Internal mounting holes are provided. Each enclosure comes complete with a 12 GA inner panel which is double bent for maximum rigidity and which mounts on M8 welded studs. Enclosures and panels are finished with heat fused polyester powder, electrostatically applied on a phosphatized base. Box is ANSI/ASA 61 gray, panel is white (other colors available).
