

Water, oil & dust tight windowed enclosures, metric

Quick Features :

- Poured gasket
- 1/4 turn lock
- Drip shield
- Superior hinging
- 180° door opening
- Seamless welding
- Panel is included
- Panel is double bent
- Powder coated

The 6412 ESW water, oil & dust tight enclosures are used indoors or outdoors in areas where the enclosures may be subject to hosing or to water coming from any direction or for protection against dust, dirt or oil splashing. The 6412 ESW are made from quality 14 GA or 16 GA steel, with corner seams continuously welded. The window is made with self-extinguishing polycarbonate. The opening has a curled lip around all sides to prevent drip-

ping water from entering the enclosure when the door is open, it also increases rigidity. A high quality robotically poured-in-place seamless gasket ensures a complete and durable water tight seal. The pins of the concealed hinges can be pulled out to remove the door.

A 1/4 turn locking mechanism (or 3 point latch system on larger enclosures) insures positive closing. Internal mounting holes are provided. Body stiffeners are pro-

vided on larger models. Each enclosure comes **complete with a 12 GA inner panel** which is double bent* for maximum rigidity and which mounts on M8 welded studs. Enclosures are finished with heat fused polyester powder, electrostatically applied on a phosphatized base. The box is RAL7035 textured light grey, the panel is unpainted galvanized steel.
